Dist. Category UC-98

# Weekly Coal Production

Production for Week Ended:  
November 12, 1983

Released for Printing:  
November 18, 1983

**Energy Information Administration**  
Washington, D.C.

## Highlights

Production of bituminous coal and lignite in the week ended November 12, 1983, as estimated by the Energy Information Administration, was 16,576,000 short tons. This was a decrease of 644,000 short tons, or 3.7 percent from production in the previous week. Production in the corresponding week of 1982 was 15,545,000 short tons. Bituminous coal and lignite production from January 1 through November 12, 1983 totaled 672,282,000 short tons, 9.0 percent below production in the same period of 1982.

Production of Pennsylvania anthracite in the week ended November 12, 1983, as estimated by the Energy Information Administration, was 98,000 short tons, a decrease of 4,000 short tons or 3.9 percent from production in the previous week. Production in the corresponding week of 1982 was 84,000 short tons. Anthracite production from January 1 through November 12, 1983 totaled 3,953,000 short tons, 0.5 percent below production in the same period of 1982.

*Weekly Coal Production* provides timely information on coal: current statistics on the production of anthracite, bituminous coal, and lignite are provided each week; monthly, quarterly, and annual statistics on coal consumption, production, stocks, imports, and exports, and related supply and demand data are provided as they become available.

*Weekly Coal Production* is intended for use by the coal industry, the press, State and Federal Governments, policy makers, consumers, and analysts. Weekly coal production estimates are based on current trends in weekly rail carloadings of coal and current coal production trends as reported in *Coal Distribution* (Form EIA-6), monthly and quarterly coal production reports from State mine agencies, and *Coal Production Annual* (Form EIA-7a).

This report was prepared by the Energy Information Administration, the independent statistical and analytical agency within the Department of Energy. The information contained herein should not be construed as advocating or necessarily reflecting any policy position of the Department of Energy or any other organization.
